## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 21 is objected to because of the following informalities: The expression "the upset or coupling of the tubular" has no proper antecedent basis. Further, the word "an upset or coupling" in claim 21, line 6 should be --said upset or coupling-- since it refers back to "upset or coupling" in line 5. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hawkins et al (US 5,918,673).

The claimed structure reads exactly on the reference's when members (19) and (26-29) of Hawkins et al '673 are respectively considered as "mandrel" and "seal" as recited.

4. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Stokley (US 5,682,952).

The claimed structure reads exactly on the reference's when members (84) and (44 or 158) are respectively considered as "mandrel" and "seal" as recited.

*Allowable Subject Matter*

5. Claim 21 is allowed.
6. Claims 2 and 4-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Specification*

7. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

8. The abstract of the disclosure is objected to because the abstract exceeds 150 words.

Correction is required. See MPEP § 608.01(b).

9. The disclosure is objected to because of the following informalities: The copending application recited on the first page of the specification should be updated. Page 13, line 4,

"nose (62)" should be --nose (72)--.

Appropriate correction is required.
